Sandia
by Drexel

We call it Sandia. After that ancient pueblo in New Mexico where the Spanish Conquistadores hoped to discover gold 400 years ago.

Like its namesake, Sandia was designed to last. It comes in a 20-step finish on pin knotty walnut veneers in your choice of rich-brown fruitwood tones or light glazed honey-colored wood on pecan and other hardwood solids. The deeply molded panel overlays and decorative details are made of Drexothane.®

Every wood top is protected from household stains by Urethanium, a new super lacquer coating that can't be washed away by soaps, alkali detergents or household cleaners.

Sandia is massive in size, opulent in shape and rich in tradition. But not in price.

Sandia is today's decorating gold.

Drexothane® is the mark of modern technology making possible design motifs heretofore impossible except in one-of-a-kind pieces. A high density rigid urethane cellular material developed by Drexel to provide a new freedom for design.

Urethanium is a new super lacquer totally immune to damage by soaps, alkali detergents and household cleaners. Excellent resistance to more than 30 household stains.

NEOSLATE

An ingenious man-made compound of asbestos and cement that resists nearly all common household stains and is impervious to heat. Te prevent scratches, Neoslate should be protected from accessories by using felt pads. To clean, wash with a cloth damp with soap and water and wipe dry.

Chief Stylist: Gus Tron
Designer: G. Michael Black
